HIGH BRIGHTNESS

ZULJANA HIGH BRIGHTNESS MONITOR

BaoBao High-Brightness Display has a sun-readable LCD screen that is perfect for advertising in windows and situations where lighting is not controlled. The High-Brightness Screens are offered in a range of sizes ranging that range from 32"-65" and can operate 24/7 which allows the broadcasting of the message after the time of closing.

The screens we offer are designed for use in high ambient lighting conditions, and with choices of between 1,500 and 2,500nits brightness, these screens are perfect for use in retail stores and shopping centers as well as airports and rail stations. These High Brightness Screens are easy to set up and come equipped with an embedded media player to allow USB playback, as well as connectivity for external devices that allow you to connect your computer or media player.

We also make outdoor IP65 high brightness screens and touch screen options that could be placed with glass to create an interactive display.
